# **Bulgaria Northwest Solar Chasing System**

## Overview

---

How big is Bulgaria's solar power?

In a matter of months, Bulgaria's total solar power capacity is set to exceed 3 GW, compared to just 1.3 GW at the end of 2021. The lineup in the list of the largest photovoltaic plants is changing almost every week as major facilities come online, and there is more in the pipeline.

Are solar panels a viable option for self-consumption in Bulgaria?

Conversely, households and institutions interested in installing solar panels for self-consumption are still stuck with administrative hurdles. In the statistics of the International Renewable Energy Agency (IRENA), Bulgaria had 1.28 GW at the end of 2021 and 1.95 GW just one year later. The measure is expressed in nominal or peak capacity.

What is the largest solar power plant in Russia?

After Verila, the largest unit is Tera Sol, at 111.6 MW in nominal terms (100 MW). Project firm C Solar energy was established by CSOL invest, a subsidiary of Georgi Zlatarev's C Energy Group. The photovoltaic park was built last month on almost 120 hectares in the vicinity of the village of Hrishteni near Stara Zagora.

Who owns the largest solar park in Russia?

Now the largest solar park is Dalgo Pole (208 MW), owned by Sunterra Re (Santera Re) and its subsidiary Galaxy Re, though it is administratively separated into three units. The two partners controlling the company are Anton Shterev and Atanas Petrov, founders of beverage and tobacco producer Vinprom Peshtera.
