Cadmium oxide thin film solar glass

Overview

Can cadmium oxide thin films be used for solar energy?

Cadmium oxide (CdO) thin films have shown great promise in recent years as a material for the solar sector. Due to its high optical transparency and strong electrical conductivity in the solar radiation spectrum region . By changing the deposition conditions, CdO's electrical characteristics can be adequately adjusted.

What are the applications of cadmium oxide thin films?

Cadmium oxide thin films are important materials for applications in various photoelectric, solar cell, optoelectronic and other kinds on devices. There are several physical or chemical synthetic methods have been used to prepare transparent CdO films as described by many researchers.

Can cadmium-free solar cells be used on ultra-thin glass?

The new cell concept was introduced in the study “ High-efficiency cadmium-free Cu (In,Ga)Se 2 flexible thin-film solar cells on ultra-thin glass as an emerging substrate,” published in the Journal of Alloys and Compounds.

How can a thin film of SP cadmium oxide be formed?

On a glass substrate, thin films of Sp Cadmium Oxide have been formed using an aqueous solution of Cadmium Chloride (CdCl_2). In the range of concentrations from 0.01 to 0.05 M by employing the Spray Pyrolysis technique .

CdO thin films deposited ...

Using spray pyrolysis, cadmium oxide [CdO] sheets were formed on glass substrate. At a temperature of 300 °C, transparent and conducting CdO films are formed. An ...

Structural and transport properties of spray pyrolysed Ce: ...

In the present study, spray pyrolysis was used to deposit undoped and cerium (Ce) doped cadmium oxide (CdO) thin films with doping concentrations (3, 5 and 7 wt %) films on ...

Efficient Quantum Dot Solar Cells with Sustainable Oxide Thin Films

Thin-film solar cells are more promising for low-cost and large-area photovoltaic devices. Tremendous efforts have been invested in using cadmium telluride (CdTe), copper ...

Comparative study of cadmium telluride solar cell ...

In this work, the performance of CdTe:As thin film solar cells on two different transparent conducting oxide coated substrates are investigated and
