**Can I bring an solar container
outdoor power to Armenia**

Overview

Does Armenia have solar energy?

Armenia also has notable solar energy potential. The average annual amount of solar energy flow per square meter of horizontal surface is approximately 1,720 kilowatt-hours (kWh), which is high relative to an average European figure of 1,000 kWh.

Who provides electricity in Armenia?

From 2006 to 2022, Electric Networks of Armenia (ENA) was the sole electric power distributor in the country, and still provides electricity to most users. It is Armenia's largest employer and serves approximately 985,000 electric utility customers.

Does Armenia have energy resources?

Armenia has limited energy resources and can meet only a fraction of the total demand for energy from domestic resources. Armenia does not have oil or natural gas reserves and is thus highly dependent on imported energy resources. It imports oil and petroleum products from Russia, Georgia, Iran, and Europe.

How has the energy sector changed in Armenia?

Armenia's energy sector has moved from a state of severe crisis in the early 1990s to relative stability today. A combination of policy, legal, regulatory, and institutional reforms have had good results.
