What frequency bands do 5G base stations use?

Utilization of Frequency Spectrum: 5g Base Stations Operate in specific Frequency Bands Allocated for 5G Communication. These bands include Sub-6 GHz Frequencies for Broader Coverage and Millimeter-Wave (Mmwave) Frequencies for Higher Data Rates.

Does 5G use more energy than 4G?

In particular, the 5G base station significantly requires more energy compared to the 4G system, especially when higher frequencies are in action. Due to the very short range of millimeter waves, several stations are required for getting complete coverage. This in turn, increases the overall energy consumption.
