

EQACC SOLAR

Canberra PV combiner box manufacturer

Overview

What is a DC combiner box?

Our DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well string monitoring solutions (I,V, T and SPD and switch isolator status), for PV systems using central inverters with PV panels in trackers and fix tilt systems.

What is a 600v DC combiner box?

600V DC combiner box is LETOP's economical solution designed for small PV systems. It offers 1-6 string inputs and 1-2 string outputs. Supports 600V DC system voltage. It also uses high-quality components to ensure overcurrent and overvoltage protection. Suitable for 5kW-10kW small residential rooftop or small commercial PV systems.

What types of solar combiner boxes are available?

We offer a variety of solar combiner boxes, including DC and AC. DC combiner boxes cover 1-24 input channels, support 600V/1000V/1500V system voltage, and current range 10A-400A. AC combiner boxes support low-voltage and medium-voltage applications.

What is a combiner box?

Solar energy has revolutionized the way we produce and consume power, and as the industry grows, the need for efficient solar installations becomes more critical. A combiner box is an essential component in a solar energy system, consolidating the output of multiple solar panels into a single electrical circuit.
