

EQACC SOLAR

Capacitor energy storage solution in Osaka Japan

Overview

What is a hybrid super capacitor (HSC)?

Musashi Energy Solutions develops, manufactures, and sells hybrid super capacitors (HSCs), which are attracting attention for the realization of a carbon-neutral society. HSC is a sustainable power storage device that features high output, long life, and high safety.

Why is Sumitomo launching a large-scale energy storage platform?

One of the main reasons is the insufficient capacity of transmission lines. In response to this issue, Sumitomo Corporation aims to expand its business of storing energy nationwide in Japan by developing a large-scale energy storage platform that can compensate for this lack of transmission line capacity.

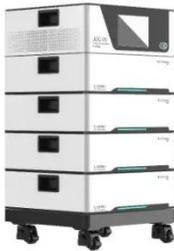

What is a Musashi energy storage system?

Musashi's state-of-the-art HSCs are designed to provide high-reliability energy storage in many applications and are known for their power density, longevity, and reliability. The technology reduces equipment size, weight and total cost of ownership. Key features of the CESS include:.

What is Japan's first energy storage project?

In 2015, we started Japan's first demonstration project covering energy storage connected to the power grid in the Koshikishima, Satsumasendai City, Kagoshima. This project is still operating in a stable manner today. One feature of our grid energy storage system is that it utilizes reused batteries from EVs.

Capacitor energy storage solution in Osaka Japan

Japan Launches Largest Renewable Battery Storage Project By Osaka ...

Japan's largest renewable battery energy storage system (BESS) project has broken ground in Kyushu under developers, Osaka Gas and Sonnedix.
