Central Africa Solar Tiles

Overview

What are solar roof tiles?

Solar roof tiles replace regular roofing tiles with solar tiles, these are in effect solar panels that are able to use photovoltaic cells in order to convert sunlight into electricity. Marley solar roof tiles are uniquely effective in their use of solar tiles for roofs, with a host of features that make them more efficient than regular solar.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.

Do solar roof tiles have a warranty?

Glass and steel roofing tiles make up solar roof tiles. While the latter is flexible and can be installed on rooftops of any size or shape, the former is strong and offers exposure to the sun, which produces energy. In addition, while solar panels have a 20-year warranty, solar roof tiles have a 25-year warranty.

What is a Marley solar tile system?

The Marley Solar Tile system consists of a series of PV roof tiles that are integrated into the roof line. Whenever sunlight reaches the cells, it results in an electrical current suitable for powering your home. As a bonus, you can also feed excess energy back into the grid and earn money.
