# Central Asian energy storage power export

## Overview

---

Why is the Central Asian region a major exporter of energy?

The central Asian region (CAR) is one of the most regions that contain much more energy. In this way, it is one of the primary exporters of energy for the global market. The Central Asian area contains around 5.5% of the world's hydro potential. Furthermore, over 20% of the world's investigated uranium is in Kazakhstan and Uzbekistan.

Can energy storage solve transboundary water and energy conflict in Central Asia?

A solution for transboundary water and energy conflict in Central Asia is proposed. Benefits of energy storage beyond the energy sector are shown. Long duration energy storage is key for high shares of solar PV and wind energy in the region. An open-access, integrated water and energy system model of Central Asia is developed.

What is the energy sector in Central Asia?
