Charging module inverter 30kw

Overview

What are the features of 30kW EV charging module?

Combine with the latest EV charging technology, key features of this 30kW EV dc charger module include high reliability, high efficiency, high power factor, high power density, wide output voltage range, low noise, low standby power consumption and good EMC performance. Check out the details of this EV charging module below.

What is a 30kW power module?

30kW power module supports a broad output range that caters to a variety of electric vehicles, including future high-voltage platform vehicles. The constant output ensures stable charging performance across a wide range of voltage conditions, allowing for optimal charging and future-proof adaptability.

What is a 30kW charging module?

With a focus on high efficiency, safety, and robustness, this module is engineered to meet the growing demands of electric vehicle charging infrastructure globally. The 30kW module maximizes energy conversion with peak efficiency over 96.5% and average efficiency of 95.5%, ensuring fast, effective charging and minimal energy loss.

What is uxr10030b EV charging module?

The UXR10030B EV charging module is a 30kW power module for EV charger designed to overcome the bottleneck of charging station industry with prominent advantages of ultra-high full load working temperature and ultra-wide constant power range in the industry.

 Efficient Higher Revenue

 Intelligent Simple O&M

 Flexible Abundant Configuration

- Max. Efficiency 97.5%
- Max. PV Input Voltage 1000V
- 150% Peak Output Power
- 2 MPPT Trackers, 100% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules

- IP66 Protection Degree, support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type I SPD, prevent lightning damage
- Battery Reverse Connection Protection

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFCD Function (Optional): when an arc fault is detected the inverter immediately stops operation

Lithium battery parameters

Product capacity: 100Ah

Product size: 135*197*35mm

Product weight: 1.82kg 197mm / 7.7in

Product voltage: 3.2V

internal resistance: within 0.5
