# **Chile Telecom PV site 372KWh**

## Overview

---

How much solar power does Chile use?

It uses 776,000 polycrystalline silicon photovoltaic modules. The solar irradiance has been measured at 853 W/m<sup>2</sup> Chile has decided to use its abundant sun and wind to phase out coal-fired power by 2040 and achieve carbon neutrality by 2050. Chile generated roughly 7 percent of its electricity from solar power in 2018.

What is Chile's largest solar plant?

Its PV capacity was 2137 megawatt and it increased to 3104 megawatts by July 2020 with yet another 2801 Megawatt to be added recently. The photovoltaic plant's construction began in January 2015, and it began its operation in June 2016 with 160 Megawatt of panels, making it Chile's largest solar plant at the time.

How much electricity does Google use in Chile?

Its peak capacity of 246 MW<sub>p</sub>, generates enough electricity to power roughly 240,000 Chilean households. A total of 80 megawatts are needed to power Google's data center located in Chile.
