

EQACC SOLAR

Chile mobile energy storage site wind power construction

Overview

Which country has the most energy storage projects in Latin America?

Chile is one of the leading countries in Latin America when it comes to energy storage and has already commissioned more than 1GW of BESS, with two projects from AES Andes. Aside from these two renewable energy projects, the company has three other projects under construction in Chile with a portfolio of 2.1GW currently being built.

How much solar PV & wind curtailment in Chile in 2024?

Data from the Chilean renewable energy and energy storage association (ACERA) registered nearly 6TWh of solar PV and wind curtailment in 2024 in the country, more than doubling 2023's numbers.

How will the Cristales project impact Chile?

The Cristales project will consist of 288MW of solar PV and a 340MW BESS with a 4-hour duration. Both projects will install bifacial modules with terrain-following trackers. Combined, the projects will increase Chile's installed renewable energy capacity by 1,3250MW with AES Andes investing more than US\$1.1 billion between the two projects.

What is AES Andes doing in Chile?

Image: AES Andes. Utility AES Andes has started construction on two renewable energy projects in Chile, with a combined 1.3GW of capacity. Located in the northern region of Antofagasta, the Pampas and Cristales projects will combine solar PV, wind and energy storage.

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW/115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
