

**EQACC SOLAR**

# **China Solar Base Station Company**

## Overview

---

Where is China's 3rd largest solar power plant located?

Located in Datong City, Shanxi Province, it is the country's 3rd largest solar power plant. China's National Energy Administration aimed to install solar plants in this area. After successful completion of the project's 1st phase in 2016, this solar plant now has a total capacity of 1.1 gigawatts.

Where is TW solar technology based?

TW Solar Technology has production bases in Hefei, Yancheng, Jintang and Nantong; the Shuangliu base is under planning and is expected to be put into operation in 2025.

Is China a solar energy hub?

China is a solar energy hub that houses a number of the world's largest solar power plants. Over the last few years, China, which is the top emitter of greenhouse gases (GHG), has increased its share of renewable electricity generation.

How big is China's solar plant?

China's National Energy Administration aimed to install solar plants in this area. After successful completion of the project's 1st phase in 2016, this solar plant now has a total capacity of 1.1 gigawatts. Once the next 2 phases of the project are completed.
