

**EQACC SOLAR**

# **China all in one solar system in Puerto-Rico**

## Overview

---

When will a solar project start in Puerto Rico?

The project, inaugurated on November 1 in Salinas, Puerto Rico, is expected to begin operations at the end of 2024. DEPCOM developed, procured, and is managing the installation of the 90 MW solar project. It includes a 51.5 MW on-site battery energy storage system (BESS).

Does depcom have a solar facility in Puerto Rico?

Depcom Power has commissioned the Ciro One project, a 90 MW (AC) solar facility in Puerto Rico, along with a 51.5 MW battery energy storage system (BESS). The US-based engineering company said it is currently the largest operational solar-plus-storage facility on the island.

How many homes will Ciro one power?

It includes a 51.5 MW on-site battery energy storage system (BESS). Ciro One is expected to generate enough energy to power the equivalent of 60,000 Puerto Rico homes. The project is developed alongside developer partner Ciro Energy Group and subcontractor Lord Construction Inc. Over 370 direct jobs were made in the development of the project.

Will Puerto Rico reach 36% renewables by 2025?

The U.S. territory could reach 36% renewables by 2025 if 3.75 GW of utility-scale solar and 1.5 GW of storage that Puerto Rico has mandated the utility PREPA to procure were constructed and interconnected by year-end 2025, which would be “very rapid deployment,” the national laboratories said in a report.
