China drawout circuit breaker in Manila

Overview

What is a circuit breaker?

A Circuit Breaker is an electrical device made from materials such as metals, insulating materials, and other mechanical and electronic components for operation and tripping mechanisms.

What are the different types of circuit breakers?

They come in various types and sizes to accommodate different voltage levels and current ratings, ranging from small residential circuit breakers to large industrial circuit breakers. Circuit Breaker prices vary depending on the brand and electrical current capacity.

How does a circuit breaker work?

A circuit breaker works by automatically breaking the flow of electrical current in a circuit when it detects abnormal conditions such as overcurrent or short circuits. Is a circuit breaker important?

A circuit breaker is a device that's essential for ensuring safety in residential or commercial electrical systems.
