# China solar power satellite factory Factory

## Overview

---

Is China about to operate Asia's largest satellite 'super factory'?

One account describes how China is about to operate Asia's largest satellite "super factory" with a capacity of 1,000 units per year, and stresses that this is "not just a manufacturing plant, but also a key link" in a comprehensive space ecosystem covering the entire aerospace industrial chain.

Is Asia's largest satellite manufacturing hub nearing operation in China?

Reports describe the broader complex as Asia's Largest Satellite Manufacturing Hub Nears Operation in China, a phrase that captures both the geographic superlative and the operational intent.

Could Hainan be China's major satellite-related manufacturing hub?

Earlier accounts of the project highlighted how China's southern Hainan Province plans to use the factory's 60,000 square meter footprint as the anchor for a broader, "major satellite-related manufacturing hub," tying in suppliers, research institutes, and service providers. The timing is equally significant.

Can a Super Factory produce 1000 satellites a year?

One description notes that a satellite "super factory" capable of producing 1,000 satellites annually is set to begin operation at the Wenchang In spaceport area, tying the plant directly to one of China's most important coastal launch centers.
