# **Communication 5g base station large order landed**

## Overview

---

How many 5G base stations are there in China?

BEIJING -- The number of 5G base stations in China now exceeds 4.1 million, data from the Ministry of Industry and Information Technology showed Friday. Currently, 5G technologies have been applied in 80 major sectors of the national economy, and the 5G network is covering more rural areas, according to the ministry.

What is a 5G base station?

As part of a network's wireless telephone system, a 5G base station is a fixed communication point that connects using a single or several antennas. It comprises a wireless receiver and a short-range transceiver with an antenna and analog-to-digital converters (ADCs) to convert radio frequency impulses to digital signals.

How is the 5G base station market segmented?

The global 5G Base Station Market is segmented based on Frequency Band, Component Type, Station Type, End-use, and Geography. Based on the Frequency Band, the market is further segmented into less than 2.5 GHz, 2.5 – 8 GHz, 8 – 25 GHz, and more than 25 GHz.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.
