

EQACC SOLAR

Communication high voltage container generator set

Overview

What is a containerized generator?

Less Maintenance The Containerized Series generator sets are designed for harsh weather and strict acoustical standards, utilizing a standard 40' high cube container equipped with an array of innovative features, allowing the system to operate reliably even in the hottest environments - validated at ambient temperatures of up to 55 degrees Celsius.

What is a high-voltage generator set?

A high-voltage generator set refers to a power generation system with an output voltage significantly higher than standard low voltage (400V/480V). In other words, these units operate at 6.6kV, 10kV, 11kV, or higher, specially designed for high-power supply, industrial facilities, as well as long-distance power transmission.

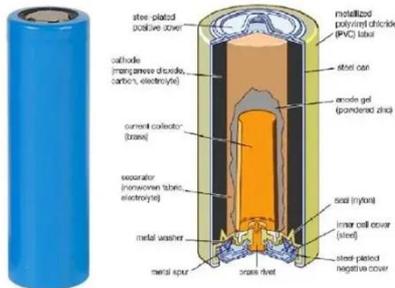

What is container type diesel generator set gencircle supply?

Container type Diesel Generator Set Gencircle supply container type generator set is design in accordance with ISO/TC104 standard size, rational construction, to make sure the generator set will not be damaged due to under high pressure in transport, and is suitable for ship transportation.

What are the different types of container generators?

We can supply the 20' container, 40' container, and widen or heighten container type. They are divided into the normal type and silent type. This series generator set can be easily moved to the desired location, can run under the most demanding working conditions.

Communication high voltage container generator set

Containerised Generators

Our Containerised Generators deliver robust, high-capacity power from 300-3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, ...
