

EQACC SOLAR

Community uses Southeast Asian solar container single-phase

Overview

Are solar energy policies transitioning in Southeast Asia?

The transition of solar energy policies in Southeast Asia countries is discussed. The detailed structure of Net Energy Metering (NEM) policies, including eligible sectors, capacity, renewable energy target and tariff for surplus energy in Southeast Asia countries, is addressed.

Will PV demand increase in Southeast Asia by 2028?

PV demand in Southeast Asia is expected to rise by over 70% by 2028, but issues remain regarding grid capacity, slow approvals, and policy hurdles. Governments must enhance cooperation, upgrade grids, and accelerate projects to support the energy transition.

What is the growth rate of PV market in Southeast Asia?

By 2024, PV demand reached 1–1.6 GW, with 2025 demand expected to rise to 1.4–2.4 GW, growing 40–50%. Vietnam is showing faster growth than most other Southeast Asian markets. Southeast Asia's PV market is growing steadily, despite weaker demand in some countries.

Can ASEAN countries meet the 3% renewable capacity target?

With only a 3% renewable capacity increase necessary to meet this target, ASEAN countries are expected to not only meet this goal, but surpass it. The Association of Southeast Asian Nations (ASEAN) member states include Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, the Philippines, Singapore, Thailand, and Vietnam.
