

**EQACC SOLAR**

# **Compact power station factory in Gambia**

## Overview

---

Who owns the power plant in the Gambia?

These facilities are operated by National Water and Electricity Company (NAWEC) and Karadeniz Power ship Koray Bey Company Limited - an Independent Power Producer (IPP). In 2018, the effective electric installed capacity in The Gambia was around 135 MW.

How much electricity will Gambia generate in 2025?

The Gambia's Electricity Sector Roadmap (2019-2025) aims to scale up electricity generation to 200 MW of available capacity at peak in 2025, with 14MW expected from the OMVG project with Guinea and Senegal, and 50MW from the Souapiti project and the remainder through Independent Power Producers (IPP).

How does electricity work in the Gambia?

In 2018, the effective electric installed capacity in The Gambia was around 135 MW. About 73% of this installed capacity is operated by NAWEC while the remaining 27% is operated by an IPP (Karpowership). Currently, Electricity is transmitted from these stations for distribution via five radial 11 kV feeders and three 33 kV feeders.

Does the Gambia have a hydro potential?

Hydro potentials are non-existing in the Gambian territory. The average annual solar insolation for The Gambia is 4.5-5.3 kWh/m<sup>2</sup>-day, which represents a high generating potential for the country, making it interesting for PV Power Plants, Solar Home Systems (SHS), solar heater for the domestic and hotel industry and Hybrid Diesel-PV Systems.
