Container fire generator installation

Overview

Can you put a generator in a container?

Generators can be put into containers. There are a number of benefits to doing this including: Easier transportation and installation making them ideal for temporary or remote applications. They are more secure as typically they are lockable which prevents unauthorised access. Do I need to service my power system?

Put simply, yes.

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

What is a containerized generator set?

The durable and robust Containerized Series generator sets are ideally suited for independent power producer (IPP), mining, oil and gas, or any project where harsh conditions, challenging environments and the demand for reliable, continuous remote power exist.

Can a fire pump be installed in a shipping container?

A complete fire pump set inside a standard shipping container. Both 20 ft and 40 ft containers available, depending on equipment needs. The entire containerized solution can be removed easily, shipped to a new location, and reinstalled. Ventilation with exhaust fans to control internal temperature and enough air supply for a diesel engine.
