

**EQACC SOLAR**

# **Copenhagen energy storage power station container manufacturer**

## Overview

---

What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

How can Denmark develop a new energy technology?

If Denmark shall succeed in the development and implementation of new energy technologies such as energy storage and conversion, a broad knowledge of political and legal frameworks, economic models, the role of civil society as well as new forms of organization and collaboration across sectors and disciplines is necessary.

Why is Denmark a good place to store CO<sub>2</sub>?

As global climate goals demand a significant reduction in CO<sub>2</sub> levels, the IEA calls for capturing 100+ billion tons of CO<sub>2</sub> by 2060. Denmark, with just 0.1% of global carbon emissions, aims to cut 70% by 2030 and reach carbon neutrality by 2045. Denmark's geology makes it safe and efficient CO<sub>2</sub> storage.

What is a battery storage project?

Our goal is to build an integrated business where technology, power trading, and development work together to create long-term value. Initiating a battery storage project involves ensuring proximity to the grid's transmission level, with a screening process initiated with grid operators to assess available capacity.
