Cost of a 2MWh Energy Storage Container

Overview

How much does a 2MW battery storage system cost?

In total, the cost of a 2MW battery storage system can range from approximately \$1 million to \$1.5 million or more, depending on the factors mentioned above. It is important to note that these are only rough estimates, and the actual cost can vary depending on the specific requirements and characteristics of each project.

How much does energy storage cost?

****Battery Cost****: The battery is the core component of the energy storage system, and its cost accounts for a significant portion of the total cost. As of 2024, the cost of lithium-ion batteries, which are widely used in energy storage, has been declining. On average, the cost of lithium-ion battery cells can range from \$0.3 to \$0.5 per watt-hour.

How much does a battery storage system cost?

The cost of the BMS can account for about 5% to 10% of the total battery storage system cost. For a 2MW system, if we assume a BMS cost ratio of 8%, and the total system cost excluding the BMS is \$800,000 (as calculated for the battery cost above), then the cost of the BMS would be $\$800,000 \times 0.08 = \$64,000$.

How much does a power conversion system cost?

4. ****Power Conversion System (PCS) Cost****: The PCS is used to convert the direct current (DC) power stored in the battery to alternating current (AC) power for use in the grid or other electrical loads. The cost of the PCS can be around 10% to 20% of the total system cost.

Cost of a 2MWh Energy Storage Container

Wonvolt Bess Battery Storage System 2MW 4mwh 2.5mwh 5mwh Solar Energy

Wonvolt Bess Battery Storage System
2MW 4mwh 2.5mwh 5mwh Solar Energy
Storage Battery Container Price
US\$65,000.00-150,000.00 1 Box (MOQ)
