

**EQACC SOLAR**

# **Cost of a 60kWh Solar Energy Storage Container**

## Overview

---

How much does solar energy storage cost?

Adding solar energy storage typically costs between \$12,000 and \$20,000. For example, a Powerwall battery costs about \$15,500 fully installed by Tesla, whereas a Panasonic EverVolt battery would be closer to \$18,000.

How much does a 60kW Solar System cost?

The cost of 60kW solar power systems varies. On the lower end, you might expect to get Chinese inverters such as Sungrow, Growatt, JFY, Goodwe etc. and Chinese (lower-tier) panels such as Hannover, Munsterland, ZN Shine etc. You might expect to pay \$69,000.00 for such a system.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.
