

Cuba Economic Development Energy Storage Project

Overview

How can Cuba improve energy security?

In the Int-a and Int-b scenarios, Cuba still needs to import refined fuels which are mainly required by the industrial and transport sectors. Therefore, energy security can be improved by reducing the oil subproducts demanded by these activity macro sectors (i.e. MS1 and MS7).

How did the Soviet Union affect the Cuban economy?

During the 1990s, after the collapse of the Soviet Union, energy dependency on foreign resources led to a major setback for the Cuban economy. The state was forced to slash its energy imports which affected its energy security. The government responded by implementing reforms that led to a change in society concerning energy use.

What is Cuba's energy strategy?

2.2.2. Electricity production The Cuban government is aiming to match future energy needs with a more self-reliant supply. Its strategy consists of reducing the importation of energy by producing more domestic resources.

How vulnerable is Cuba's energy system?

Conclusions The current situation of Cuban energy system is vulnerable since the country strongly depends of energy imports. This vulnerability is evidenced through the study of different aspects such as energy security, carbon footprint, air quality, and economic.
