

EQACC SOLAR

Custom-made 40-foot solar-powered container for farm use

Overview

What is a vertical farming container?

Available in 20-foot and 40-foot shipping containers. Vertical farming container is fully customized to customer's needs based on proven technology. SQUARE m² (Square Meter) Fodder farm container allows farmers to grow livestock feed on site. Fodder is a nutrient-dense hay that's used as a dietary supplement for cows, pigs, horses, sheep & chicken.

What is a container farm called The Greenery?

The Greenery is a next generation container farm enabling local, hydroponic food production anywhere in the world. Developed by Freight Farms—the company that created the world's first container farm—The Greenery packages the most advanced indoor growing technology into a modular 40-foot shipping container.

How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

How much does a shipping container farm cost?

20-foot shipping container farm costs starting from EUR 44 000. 40-foot shipping container farm costs starting from EUR 69 000. Container farms can be equipped with solar panels and suited for operating off-grid. Are shipping container farms insulated?

Each unit has been insulated with polyurethane foams. Are container farms profitable?
