

EQACC SOLAR

Distributed solar module prices

LiFePO₄ Battery, safety

Wide temperature: -20~55°C

Modular design, easy to expand

Wall-Mounted&Floor-Mounted

Intelligent BMS

Cycle Life: ≥ 6000

Warranty: 10 years

Overview

What is distributed solar?

Distributed solar contrasts strikingly with utility-scale solar energy (USSE) enterprises, as the latter have relatively larger economies of scale, high capacity (typically >1 MW), and are geographically centralized—sometimes at great distances from where the energy will be consumed and away from population centers.

What is distributed solar PV?

(Distributed refers to smaller solar power generation facilities that are located close to consumers and connected to distribution systems, with access voltage below 35 kilovolts.) China's new installed capacity of distributed solar PV in 2017 was 19.4 gigawatts —3.6 times higher than it was just a year before.

When will BC module prices be added in Eurpoe?

In Eurpoe, the public pricing for BC modules (residential and C&I) will be added from June 2025. InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar panel costs with our comprehensive market analysis.

Where did photovoltaic cost data come from?

Photovoltaic cost data between 1975 and 2003 has been taken from Nemet (2009), between 2004 and 2009 from Farmer & Lafond (2016), and since 2010 from IRENA. Prices from Nemet (2009) and Farmer & Lafond (2016) have been converted to 2024 US\$ using the US GDP deflator, to account for the effects of inflation.

Distributed solar module prices

Solar module prices spiked in early 2025 -

Thanks to Anza Renewables for sharing its Q1 2025 Solar Module Pricing Insights Report. The data in this report represents median DG list prices from over 35 module vendors ...

[Get Price](#)

Average distributed solar module price hits US\$0.27/W in ...

The average price of solar panels used in distributed generation projects in the US reached US\$0.27/W by the first half of the year.

[Get Price](#)

Average distributed solar module price hits US\$0.27/W in ...

The Anza report also highlights that heterojunction technology (HJT) modules remain the most expensive in the distributed sector, with an average price of US\$0.38/W.
