**Do I need to pay for electricity
when I use solar panels**

Overview

Will I still have an electric bill after installing solar panels?

Yes, you will still have an electric bill after installing solar panels. But how big (or small) will that amount be?

The size of your monthly electric bill with solar panels can depend on several factors: Your utility company will still send you a bill containing electricity charges that cover customer service and delivery fees.

How much is my monthly electric bill with solar panels?

The size of your monthly electric bill with solar panels can depend on several factors: Your utility company will still send you a bill containing electricity charges that cover customer service and delivery fees. Some will be flat monthly charges, while others take into consideration your total electricity usage.

Do solar panels reduce your electricity bill?

Most homeowners need power from the grid at night and when their panels aren't producing enough electricity. The average monthly residential electric bill is \$136.84 for 855 kilowatt hours, according to the Department of Energy. However, solar panels should reduce electricity bills; in some cases, your bill may go to zero.

Do solar panels cost a lot of electricity?

For most solar panel installations, you will still need to pay for some electricity from the national grid. However, as long as your solar panels work, are efficient and can maintain your energy consumption, you should still see a noticeable difference in your utility bills.
