

## EQACC SOLAR

**Does a 10-foot outdoor energy storage container need a frame**

## Overview

---

What size battery energy storage container do I Need?

From small 20ft units powering factories and EV charging stations, to large 40ft containers stabilizing microgrids or utility loads, the right battery energy storage container size can make a big difference.

How important is a battery energy storage container?

Container size alone doesn't determine a BESS system's effectiveness — design and layout also matter. A well-structured battery energy storage container optimizes internal airflow, reduces cable loss, and ensures better thermal control.

How do I choose a containerized energy storage system?

The most common standards are: Choosing between these sizes depends on project needs, available space, and future scalability. Regardless of format, each containerized energy storage system includes key components such as battery racks, BMS, EMS, cooling, and fire protection.

What factors should you consider when choosing a 40ft container?

Consider these practical factors: Site footprint and installation space: A 40ft container may offer more capacity, but only if the site can accommodate it. Power and energy requirements: Some applications need high discharge power (kW), while others prioritize total energy (kWh).

**Efficient  
Higher Revenue**

**Intelligent  
Simple O&M**

**Flexible  
Abundant Configuration**

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 100% DC Input Oversizing
- Max. PV Input Current 15A, Compatible with High Power Modules
- IP65 Protection Degree: support outdoor installation
- Smart 11 V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type-A SPD: prevent lightning damage
- Battery Reverse Connection Protection
- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
