

## EQACC SOLAR

# Does an inverter need to be used off-grid

## Overview

---

What is an off-grid inverter?

Though fundamentally an off-grid inverter, this versatile model features grid input support—allowing it to draw power from the grid when solar and battery resources are insufficient. Commonly known as an off-grid hybrid inverter, it combines solar + battery + optional grid power, ensuring uninterrupted energy supply.

What does a grid connected inverter do?

Photovoltaic grid-connected inverters rely on the large power grid to operate. When the power grid is disconnected, the grid-connected inverter will be in an island protection state and stop working. Its main function is to convert solar energy into electrical energy and transmit it through the power grid.

How do I implement an off-grid solar inverter system?

Successfully implementing an off-grid solar inverter system involves more than just installing equipment; it is a systematic process that requires a scientific assessment of energy needs, careful budget planning, and proactive future-proofing.

What is a grid-tied inverter?

A grid-tied inverter solely designed for solar-to-grid applications, with no battery support. It provides efficient solar energy conversion and direct grid feed-in but cannot store energy. Ideal for locations with stable grid access and net metering policies, where users aim to offset electricity bills without investing in battery systems.

## Using a grid tie inverter off grid , DIY Solar ...

So it \*looks\* like using a non AC couple enabled GTI off grid is possible, in theory at least. The grid tie inverter will happily

- 
**Efficient Higher Revenue**
  - Max. Efficiency 97.5%
  - Max. PV Input Voltage 600V
  - 150% Peak Output Power
  - 2 MPPT Trackers, 150% DC Input Oversizing
  - Max. PV Input Current 16A, Compatible with High Power Modules
- 
**Intelligent Simple O&M**
  - IP65 Protection Degree: support outdoor installation
  - Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
  - DC & AC Type II SPD: prevent lightning damage
  - Battery Reverse Connection Protection
- 
**Flexible Abundant Configuration**
  - Plug & Play, EPS Switching Under 30ms
  - Compatible with Lead-acid and Lithium Batteries
  - Max. 6 Units Inverters Parallel
  - AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation

co-exist with ...
