

# Does the Mauritius power station need a generator

## Overview

---

How much energy does Mauritius generate?

Mauritius has a nominal installed capacity of 876.76 MW, out of which 498.47 MW are from CEB generating units and the remaining 378.29 MW are from Independent Power Producers, Medium Scale Distributed Generators and Small Scale Distributed Generators. In 2018, the total energy generated amounted to 2,827.6 GWh.

Does Mauritius need a battery energy storage system?

Mauritius aims to increase the share of renewable energy sources in its energy mix, which leads to fluctuating power injection. To reduce this fluctuation from variable renewable energy sources, the installation of Battery Energy Storage Systems (BESS) is required.

Does Mauritius have a waste-to-energy project?

Mauritius produces about 500,000 tons of solid waste per year and its only landfill site is nearly full. In 2016, CEB (Mauritian utility company) issued a Request for Proposals for a 24 MW waste-to-energy project. Accordingly.

How has the Mauritian government changed the energy sector?

The Mauritian government has made significant changes in the energy sector. In particular, it created the Mauritius Renewable Energy Agency (MARENA) in 2016 to promote the use of renewable energy in Mauritius.
