

**EQACC SOLAR**

# **Dominic Energy Storage Inverter Power Supply**

## Overview

---

The new Energy Storage inverter features very powerful charge controlling capabilities, the maximum charge and discharge current of the battery is 210A, and the maximum input power up to 10,000W, maximum input power is 45,000W, which can greatly increase the amount of self-generation electricity and smartly prioritize the self-consumption of stored energy. What is uninterruptible power supply (UPS)?

Uninterruptible power supply (UPS) is the last line of defense to ensure the safe and stable operation of the key equipment of the communication base station. There are many stringent requirements on the security and reliability of BMS, and dauntu energy storage has made full preparations.

Why are energy storage inverters important?

Energy storage inverters are essential because the intermediate stored energy can be used to consume or feed into the utility grid. This is because the energy stored in the battery is direct current (DC). In contrast, the utility grid and the usual loads (electronic devices, motors) use alternating current (AC).

Why should you choose dauntu energy storage?

There are many stringent requirements on the security and reliability of BMS, and dauntu energy storage has made full preparations. From core chip selection to system-level architecture, we guarantee the safety and reliability of battery products in an all-round and real-time manner.

## Dominic Energy Storage Inverter Power Supply

---

### Energy Storage inverters-Senergy

Energy storage inverter offer a wide range of technical approaches to managing our power supply to create a more resilient energy infrastructure and deliver cost savings to ...
