# Dominican Republic Solar Container 100kWh

## Overview

---

How many solar projects are there in the Dominican Republic?

The solar energy projects in the Dominican Republic began operating in 2016. Currently, there are 11 definitive concessions for the generation of PV electrical energy. These projects cover an installed capacity between 3 MW and 58 MW (see Fig. 5.). Next, a brief inventory first of its kind in the country.

Why is the Dominican Republic interested in solar energy?

The framework conditions for this are provided by the world's largest energy source, the sun. Global radiation is about double that of Germany. The Dominican Republic's energy supply is largely dependent on crude oil imports at present. The rising import price of this limited energy source is leading to increased interest in solar power.

Are there solar power stations in the Dominican Republic?

Photovoltaic Power Stations (current and possible - in study) in Dominican Republic. Own elaboration. The solar energy projects in the Dominican Republic began operating in 2016. Currently, there are 11 definitive concessions for the generation of PV electrical energy.

What is the installed capacity of photovoltaic energy in the Dominican Republic?

The installed capacity of photovoltaic energy in the Dominican Republic is 0.43 GW.<sup>5</sup> Photovoltaic energy in the Dominican Republic is increasing rapidly and could be 1. Introduction currently a topic of high priority and relevance worldwide. Among these strategies are those that lead to the reduction of greenhouse gases (GHG).
