Eastern European Power Company 5G Base Station

Overview

How many 5G base stations does the EU-27 have?

The EU-27 has deployed around ten 5G base stations per million capita, whereas South Korea has rolled out around 1,500 base stations per million (by the end of 2019). The EU-27 has upgraded 1% of 4G base stations to 5G, whereas South Korea upgraded 98% (by the end of 2019).

What is the European 5G Observatory?

The European 5G Observatory is a valuable resource for anyone interested in the development of 5G networks. Whether you are a policymaker, researcher, telecom operator, or simply a tech enthusiast, the Observatory offers reliable and up-to-date information on 5G's progress.

Is 5G available in Europe?

More than half of EU Member States have not yet launched 5G commercial services, whereas the first commercial services were available in South Korea and the US one year ago. The share of the subscriptions using 4G networks is around 70% in Europe in 2019, significantly lower than in the US, China and South Korea, where it reaches around 90%.

Why should Europe invest in 5G?

Europe has significant industrial strengths which can underpin 5G deployment. Europe's sophisticated research base, industrial sector and consumer markets should underpin rapid deployment of 5G and development of an innovative 5G and IoT sector.
