# **Eastern European solar container outdoor power BESS price**

## Overview

---

How many GWh of Bess capacity did Europe install in 2023?

In 2023, Europe installed 17.2 GWh of new BESS capacity, with a 94% year-on-year market surge and marking the third year in a row of doubling the annual market (see Fig. 1).

What is the growth rate of Bess-PV & solar & storage?

It showed annual growth rates of 197%, mainly driven by the massive expansion of the residential battery segment. Last year, Czech households installed 910 MWh of solar & storage, the highest BESS-PV attachment rate in Europe (94%). This record level has been achieved thanks to the very well-established support of the New Green Savings Programme.

Will Bess expand in Europe by 2029?

While our five-year outlook foresees significant BESS expansion in Europe – a sixfold increase to nearly 120 GWh by 2029, driving total capacity to 400 GWh (EU-27: 334 GWh) – this remains far below the levels required to meet flexibility needs in a renewable-driven energy system.

What is Solarpower Europe?

SolarPower Europe is a member-led association that aims to ensure that more energy is generated by solar than any other energy source by 2030. Welcome to the European Market Outlook for Battery Storage 2024-2028.
