# Electric car battery as outdoor power source

## Overview

---

Can you use an electric car as a home battery?

Using An Electric Car As a Home Battery May be Easier than you Think: How To Power Your Home With Your EV as the Battery Backup or Instead of a Home Generator. Image © Mike Reynolds Home batteries for power storage from solar PV to during outages or to power a home during the nighttime makes homes more resilient, but are very expensive.

Can a car battery be used for emergency backup electricity?

With the right steps, you can use your car's power for emergency backup electricity. Car batteries are made to give a lot of energy to start your car. This same energy can power small electronics or charge your devices when needed. But, it's key to know the limits and safety rules when using your car battery this way.

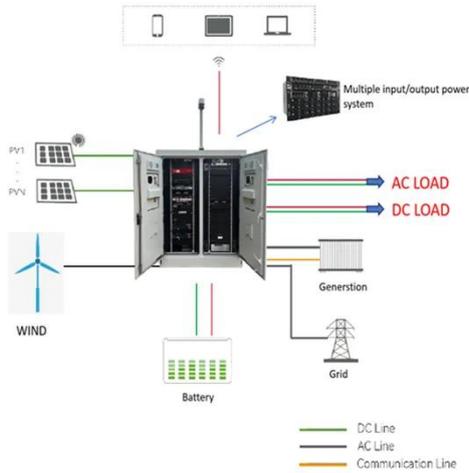

Could an electric car Power Your House as a backup?

The electric car in your laneway could potentially power your house as a backup, find out how! As we transition away from fossil fuels towards cleaner energy, two of the more notable advances in the electrification of our lives and societies are electric vehicles and home batteries.

Can electric cars help power our homes?

That rant is to say, that I suspect our cars in the future will play a huge role in helping power our homes during emergencies, and even help balance power grids. Combining solar panels with a bidirectional EV and a smart 2-way charger transforms your electric car into a powerful home energy asset.
