

# Electricity generated by solar panels in Panama

FLEXIBLE SETTING OF  
MULTIPLE WORKING MODES

## Overview

---

What type of energy is produced in Panama?

Based on the United States Energy Information Administration data from 2022, electricity in Panama is produced from the following sources: fossil fuels 21.83%, wind 3.98%, solar 4.88%, hydro 69.32%, nuclear 0.00%, and geothermal 0.00%. You can also compare the energy mix of Panama to other countries.

How many solar installations are there in Panama?

According to data from the Public Services Authority (Asep), there are at least 49 solar installations in Panama that will produce 7.7% of the country's total electricity by 2024.

Why is Panama launching a solar park?

Panama formally inaugurated the Santiago Solar Park, a \$70 million investment by the Naiad Renewables Group with a capacity to produce 86,333 megawatts peak (MWP), providing a new boost to renewable energy in this country, where the photovoltaic and wind energy segments accounted for 12.9% of total electricity generation in 2024.

What is the electricity price in Panama?

The electricity price for businesses is PAB 0.195 kWh or USD 0.195. These retail prices were collected in March 2025 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Panama with 150 other countries. Historical quarterly data, along with the latest update from September 2025 are available for download.
