

EQACC SOLAR

Energy companies use ultra-large capacity photovoltaic energy storage containers

 easy to install and use

 World wide Products

 faster charging and discharging

 Multiple protection with alarm systems

Can save energy

the battery capacity can be increased freely and flexibly according to the situation of home use.

Rechargeable lithium batteries use safe LiFePO4

Overview

What is CATL's new energy storage system?

This is CATL's new move in the energy storage space after the April 2024 release of Tener, an energy storage system with zero degradation for five years. Tener is a standard 20-foot containerized energy storage system with a total capacity of 6.25 MWh, the highest energy in the world at the time.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

How many large-capacity energy storage cells are there in China?

This year's exhibition saw participation from over 120 Chinese energy storage companies, which unveiled hundreds of new storage products and solutions. Among them were more than 20 large-capacity cells, covering capacities such as 392Ah, 472Ah, 587Ah, and 684Ah.
