Energy company uses 20MWh mobile energy storage container

Overview

Chinese multinational Envision Energy has unveiled the world's most energy dense, grid-scale battery energy storage system packed in a standard 20-foot container. What is Qianyuan Smart Storage 20MWh?

The Qianyuan Smart Storage 20MWh system marked its first external exhibition debut at SNEC 2025, where a product launch event and certification ceremony were held. Adopting a modular integration design, the system achieves a single-container capacity of 20MWh and a design lifespan of 25 years, leading the global industry.

What is Envision's new energy storage system?

A company representative mentioned that in 2023, Envision set a new standard in energy density with its 20-foot container, 5 MWh battery energy storage system. The latest capacity breakthrough was made possible by the use of large-capacity cells, system integration, compact design, and further optimization within the container.

What is AI-powered energy storage & X?

At the EESA show, the company also launched its AI-powered "energy storage + X" solution for grid-scale battery storage systems capable of facilitating sizing and construction of projects as well as their operation, specifically their lifecycle services and trading in the electricity spot market.

How much energy does a liquid cooled container hold?

The latest generation product has an energy density of more than 440 Wh/l, a roundtrip efficiency of 96%, and a cycle lifetime of nearly 16,000 charge-discharge cycles. The liquid-cooled system has a voltage range from 1500 V – 2000 V and is configurable for storage durations of two to eight hours. The container weighs around 55 tons.
