# Energy storage project cost per watt

## Overview

---

Will additional storage technologies be added?

Additional storage technologies will be added as representative cost and performance metrics are verified. The interactive figure below presents results on the total installed ESS cost ranges by technology, year, power capacity (MW), and duration (hr).

How much does a PV system cost?

Our operations and maintenance (O&M) analysis breaks costs into various categories and provides total annualized O&M costs. The MSP results for PV systems (in units of 2022 real USD/kWdc/yr) are \$28.78 (residential), \$39.83 (community solar), and \$16.12 (utility-scale).

How much does a PV system cost in 2022?

The current MSP benchmarks for PV systems in 2022 real USD are \$28.78/kWdc/yr (residential), \$39.83/kWdc/yr (community solar), and \$16.12/kWdc/yr (utility-scale, single-axis tracking). For MMP, the current benchmarks are \$30.36/kWdc/yr (residential), \$40.51/kWdc/yr (community solar), and \$16.58/kWdc/yr (utility-scale, single-axis tracking).

How much does community solar cost?

The MMP results are \$30.36 (residential), \$40.51 (community solar), and \$16.58 (utility-scale). The community solar O&M cost is higher than the O&M cost for a single-customer commercial PV system of similar configuration because of the community solar subscriber management cost, which accounts for about 40% of the total community solar O&M cost.
