

EQACC SOLAR

Energy storage solar container lithium battery 10kva

Overview

How does a 10kW solar panel work?

The 10kW solar panels are engineered to maximize energy capture, providing ample power to charge the included 10kWh lithium-ion battery storage system. This high-capacity battery solution ensures reliable energy storage, allowing you to harness and store surplus solar energy for use during periods of low sunlight or at night.

Why should you choose a 10kW Solar System?

Enjoy the freedom and security of having a robust and sustainable energy solution at your disposal. Experience the next level of energy independence with our 10kW solar system and 10kWh lithium-ion battery storage, and take a substantial stride towards a greener, more self-sufficient future.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.
