

# Estonian energy storage product supplier

## Overview

---

What is the main source of energy in Estonia?

In 2014 Estonia's primary energy production exceeded 244 thousand TJ with over 77 percent produced from shale oil and 18 percent from wood. Estonia energy demand is satisfied through domestic production (70 percent) and imported supplies, mainly natural gas and both gasoline and diesel oil (30 percent).

How will a battery energy storage park work in Estonia?

The battery energy storage park and its substation will be connected to the electricity transmission network using a 330kV AC underground cable, marking a first in Estonia. Baltic Storage Platform confirmed that the BESS will seek to ensure the stability and resilience of the Estonian electricity grid.

Who sells electricity in Estonia?

In Estonia's electricity market, Eesti Energia is the largest seller with a 60% market share and owns the largest distribution network, representing 86% of the distribution market. The Estonian Competition Authority (ECA) regulates transmission and distribution rates, as well as connection charges. Electricity in 2020:.

Which chemistry products are exported to Estonia?

Producers of construction chemicals, namely sealants and construction adhesives, play a big role in chemical product exports. Export volumes of applied chemistry are more modest, but Estonia has a long experience in producing cosmetics and applied chemistry such as home care products.
