

EQACC SOLAR

Estonian supercapacitor manufacturer

Overview

What is the largest supercapacitor factory in Europe?

Our ISO 9001- and 14001-certified Dresden Superfactory in Germany is the largest supercapacitor factory in Europe. Our upcoming production facility for graphene-based supercapacitors, the Leipzig Superfactory, will be the largest and most modern supercapacitor factory globally.

What are skeleton supercapacitors used for?

Founded in 2009, Skeleton's supercapacitors are used in transport, grid, industrial, and automotive applications and allow to reduce CO2 emissions and save energy.

What is the Leipzig superfactory?

Our upcoming production facility for graphene-based supercapacitors, the Leipzig Superfactory, will be the largest and most modern supercapacitor factory globally. We have raised more than 300 million euros of capital to scale up development and production of Curved Graphene-based energy storage technologies. to electrify the world!.

How many supercapacitor cells does skeleton produce a year?

The next-generation supercapacitor cell factory is scheduled to start production in 2024 and produce up to 12 million cells a year, which is 40 times more than Skeleton's first factory in Saxony, Germany that will continue as an R&D factory in the future.
