Overview

What is medium voltage switchgear?

Medium Voltage (MV) Switchgear is a fundamental component that helps safeguard electrical systems with voltage rankings between 1kV and 38kV. RESA Power is a proud distributor and manufacturer of a variety of switchgear styles including metal-clad, metal-enclosed, pad-mounted, and more.

What is a high voltage switchgear?

Typically used in power substations and industrial plants, these high voltage (HV) switchgear devices are designed to withstand high voltage levels and provide protection against power surges and short circuits to transmit electricity over long distances.

How can Resa power help you with switchgear manufacturing services?

As a business owner, it is important to be prepared for this increase, and RESA Power can help you with our switchgear manufacturing services. As a leading electrical switchgear manufacturer and switchgear distributor, RESA Power has manufacturing facilities strategically located across the United States and Canada.

What is low voltage switchgear?

Low voltage (LV) switchgear plays a critical role in the safe, efficient, and reliable delivery of electricity with voltage rankings up to 1kV.
