# **G7 Battery Energy Storage**

## Overview

---

What will the G7 do for battery storage?

The G7 will “promote stationary battery storage development and deployment to increase storage efficiency and reduce storage costs,” as well as “encourage a diversified, sustainable, secure and transparent supply chain for battery storage”, according to the draft.

Will energy storage improve energy security?

The deployment of energy storage at that scale will transform the availability of renewable energy resources to better compete with fossil fuels and strengthen energy security, the US Department of Energy (DOE) said in a ‘US-UK Strategic Energy Dialogue 2024: Joint Statement’. The G7 comprises the UK, US, France, Germany, Italy, Canada and Japan.

What is energy storage?

Energy storage aims to stockpile excess energy when conditions for renewables are optimal, using options such as batteries, then discharge it as necessary. Hydroelectric dams currently provide the greatest store of renewable energy, but only about 15 per cent of energy is generated by hydropower.

Which countries are part of the G7?

The G7 comprises the UK, US, France, Germany, Italy, Canada and Japan. Note that the G7 does not include China, which is currently the world’s largest energy storage market by annual deployments by some distance, adding around 22GW/49GWh in 2023, ahead of the US’ 8.7GW/26GWh, the next-largest.

## G7 Battery Energy Storage

### G7 Nations Call for Sixfold Increase in Energy Storage

A draft joint statement of energy ministers who met in Turin, Italy, highlighted the importance of rapidly boosting energy storage, in particular battery energy storage systems (BESS), ...

### G7 ministers: Energy storage is key to global ...

G7 environment ministers pledge to boost battery storage for renewable energy. Batteries crucial for stabilizing energy distribution. ...

### G7 nations set 1500GW global energy storage target for 2030

G7 nations have agreed a new global energy storage target of 1500GW by 2030, a six-fold increase from today's levels.

### G7 Environment Ministers Prioritize

## Battery Storage for Renewable Energy

In a conscious move towards bolstering renewable energy deployment and combating climate change, G7 environment ministers have committed to accelerating the ...

## G7 Vows to Boost Battery Technology for ...

G7 environment ministers pledged on Tuesday to accelerate the development and adoption of battery storage technology, recognizing ...

## G7 Mandates Sixfold Energy Storage Increase, Sets 2035 ...

Briefing The G7 Energy Ministers' Meeting concluded with a clear mandate for a rapid power sector transition, committing to a sixfold increase in global energy storage to 1,500 ...

## G7 to target electricity storage in global initiative

It found that growth in batteries outpaced almost all other clean energy technologies in 2023, with 42GW added to electricity supplies around the world

thanks to falling costs, ...

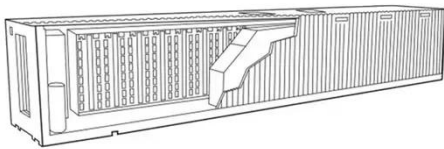

## G7 to target sixfold expansion of electricity storage

Simply sign up to the Renewable energy myFT Digest -- delivered directly to your inbox. G7 countries are set to agree a global target this weekend to increase electricity storage ...

## G7: Increase global energy storage capacity more than ...

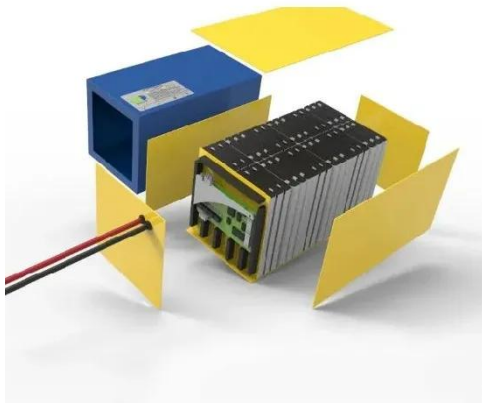

The 1,500GW target figure includes all forms of energy storage, including battery-based technologies and pumped hydro. Al so, it's worth noting that the G7 does not include China, ...

## G7 Vows to Boost Battery Technology for Renewable Energy ...

G7 environment ministers pledged on Tuesday to accelerate the development and adoption of battery storage technology, recognizing its crucial role in

advancing renewable ...

### **G7 nations set 1500GW global energy storage ...**

G7 nations have agreed a new global energy storage target of 1500GW by 2030, a six-fold increase from today's levels.

### **G7 Nations Pledge 6-Fold Increase in Global ...**

G7 countries are set to target a 6-fold rise in global electricity storage capacity by 2030, utilizing batteries, hydrogen, and other ...

### **G7 ministers: Energy storage is key to global renewable goals**

G7 environment ministers pledge to boost battery storage for renewable energy. Batteries crucial for stabilizing energy distribution. Costs decreasing but

supply chain ...

---

## **G7 Nations Pledge 6-Fold Increase in Global Electricity Storage ...**

G7 countries are set to target a 6-fold rise in global electricity storage capacity by 2030, utilizing batteries, hydrogen, and other solutions to store excess energy from ...
