Gambia Energy Storage Power Industrial Design

Overview

Is there a hybrid energy power system in the Gambia?

Table 3 Comparison of the present study with other recent research papers done using similar tools. Technical and economic simulation of a proposed hybrid renewable energy power system has been carried out in the Basse Santa Su district area of The Gambia.

Why does Gambia have a surplus of agricultural products?

Ayua et al. 20 reported that The Gambia has a surplus of agricultural products such as fruit juice, confectionery nuts, chicken feeds, and fish which are inadequately utilized because of the unavailability of the desired processing industries.

Why is Basse Santa Su important in the Gambia?

The Gambia is a country that depends on agriculture and tourism as the major source of income and the Basse Santa Su area is one of the major areas for tourism and agriculture activities. However, the lack of steady and affordable electricity posed limitations to these activities.
