German Energy Storage Container Power Station

Overview

Where is Germany's largest battery storage facility?

RWE is building Germany's largest battery storage facility to date at the Gundremmingen energy site. The 400-megawatt plant will have a storage capacity of 700 megawatt hours and will use the nuclear power plant's existing grid connection, which is currently being decommissioned.

Is a new energy storage system coming to Förderstedt?

“In Förderstedt, we’re building an energy storage system that will deliver triple the capacity and power of what is currently Germany’s largest battery in Bollingstedt, Schleswig-Holstein,” said Eco Stor Managing Director Georg Gallmetzer. That earlier system, also built by Eco Stor, has been active on the power exchange for several months.

What is eco Stor's new energy storage system?

The project is being developed and built by Eco Stor’s subsidiary, Eco Power Three GmbH. “In Förderstedt, we’re building an energy storage system that will deliver triple the capacity and power of what is currently Germany’s largest battery in Bollingstedt, Schleswig-Holstein,” said Eco Stor Managing Director Georg Gallmetzer.

Where is eco Stor building a large-scale battery storage system?

This week, Eco Stor is kicking off construction preparations for another large-scale battery storage system in Germany. The planned facility will have a capacity of 300 megawatts (MW) and 714 megawatt-hours (MWh), and will be built in Förderstedt, a town in the state of Saxony-Anhalt.
