

Ghana Group Energy Storage Power Generation Project

Overview

What is the Ghana Energy Development and Access Project?

The Ghana Energy Development and Access Project (GEDAP) is a multi-donor funding project that supports Ghana in the electricity efficiency of the distribution system and the reduction of greenhouse gas emissions, as part of the SE4ALL Action Plan.

What role does GPGC play in Ghana?

GPGC has invested close to USD 100 million in Ghana to bring additional capacity to the country's power grid with the installation of the power plant project. The company is fully committed to supporting Ghana's economic growth and is building long-term partnerships with integrity.

How will GPGC power the new power plant in Ghana?

GPGC will power the new power plant in Ghana using advanced upgraded power plants transported from Italy. These power plants will utilize General Electric Sprint Gas Turbines (LM6000PD and LM6000PF). Both turbines have recently been fully serviced by General Electric. Together, they will provide a total of 107mw additional capacity into Ghana's power grid.

How much power will General Electric provide to Ghana's power grid?

General Electric's recently serviced plants will add a total of 107mw into Ghana's power grid.
