

**EQACC SOLAR**

# **Government Procurement of 100kW Photovoltaic Container**

## Overview

---

How do government subsidies affect the PV industry?

However, lucrative government subsidies often lead to PV enterprises not paying attention to technological innovation and blind production. Therefore, to improve the efficiency of government subsidies, enhance the overall performance of the PV supply chain, and achieve the healthy and long-term development of the PV industry.

What is a PV supply chain in China?

The background of the case is introduced as follows. Under China's industrial distributed PV policy, there is such a PV supply chain system in Jiangsu, Zhejiang and Shanghai in China, in which a large PSM is responsible for the production of PV system products, and a large PSSP is responsible for the sales and service of PV system products.

Should government subsidies support PV supply chain companies?

When supported by government subsidies, the government should give full consideration to the power structure of the PV supply chain companies, and the relationship of equal status of supply chain companies is most conducive to the government's implementation of PV subsidies.

How is China transforming the photovoltaic industry in 2021 - 2022?

In 2021-2022 alone, China has introduced more than 10 support policies to encourage innovation in the development of the photovoltaic industry. Driven by government policy support and improved industry technology, China is gradually developing into one of the world's most important markets for solar PV applications.

## Government Procurement of 100kW Photovoltaic Container

---

### EPC Projects for Solar Energy & Battery Storage , Symtech ...

EPCF projects are those in which the client entrusts Symtech Solar and its Partners as contractors with the complete execution of the work, from engineering design, procurement, ...
