# **Havana backup energy storage solar container lithium battery**

## Overview

---

Flexible 2.56kWh/unit, up to 30.72kWh, supports 1 & 3-phase HV inverters. Safe LiFePO4 cells with vehicle-grade BMS. Powerful Strong backup, IP65 for indoor/outdoor use. [\[pdf\]](#)What is the first solar photovoltaic park in Havana?

HAVANA TIMES – On Febru, the first solar photovoltaic park was inaugurated, with a capacity of 21.8 MW. The project, located in Cotorro—on the outskirts of Havana—is part of the island’s government’s bet on solar energy to address the country’s dire electricity situation.

What is the energy situation in Cuba?

The energy situation in Cuba is critical. The Cuban electrical system has suffered for years due to a lack of investment, aging infrastructure, and difficulties in obtaining fuel. First published in Spanish by El Toque and translated and posted in English by Havana Times.

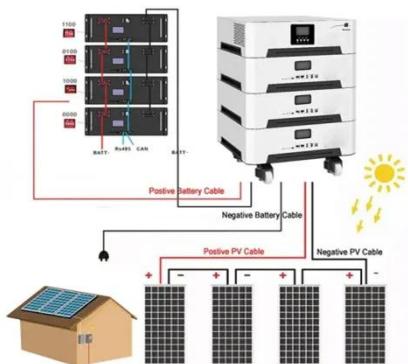

How many MW of battery backup will be installed in 2025?

Another key element to consider is the battery storage systems. Only four installations (in Bayamo, Granma; the José Antonio Echeverría Technological University in Havana; and in Cueto, Holguín) will have 50 MW of backup. This represents a total of 200 MW in the first phase in 2025.

How many solar parks will Cuba build by 2025?

The Cuban government’s plan is to install 55 solar parks similar to the one in Cotorro by 2025. The total capacity will be 1,200 MW. These are part of a broader project running until 2028, which aims to build 92 parks, with the goal of adding more than 2,000 MW to the National Electro-Energy System.
