# Havana solar container communication station wind power damaged

## Overview

---

What happened to Cuba's electrical grid?

HAVANA, Dec 3 (Reuters) - Cuba's electrical grid suffered a partial collapse early on Wednesday, leaving the capital Havana and much of western Cuba in the dark, according to state-run media and eyewitness reports.

What happened in Havana?

Energy ministry officials said an electrical substation in Havana failed around 8:15 p.m. (0015 GMT), knocking out power to a large swath of western Cuba, including the capital. The lights were out across all of Havana's waterfront skyline, a Reuters witness observed, with only a scattered few tourist hotels operating on fuel-fired generators.

How many people are without power in Havana?

The lights were out across all of Havana's waterfront skyline, a Reuters witness observed, with only a scattered few tourist hotels operating on fuel-fired generators. Reports on social media from outlying provinces both east and west of the capital city suggested much of the country of 10 million people was without power.
